Education

B.Tech/B.E. - Bachelor of Technology / Engineering, 2028

Career Point University, Hamirpur

12th, 2024

Himachal Pradesh, English

Internship

45 Days

Table and capsule defect detector

SkillNet learning

In this internship We learn about AI &ML and also learn about python language

Projects

45 Days

Tablet and Capsule defect detector

I developed a **Capsule and Tablet Defect Detector** Prototype — a proof-of-concept automated visual inspection system using computer vision and deep learning to spot defects in pharmaceutical tablets and capsules.

This isn't a full-scale industrial deployment, but rather a working prototype I built to demonstrate the core idea: replacing slow, error-prone manual checks with fast, reliable AI-based detection. It's designed to show real potential for Pharma quality control while being achievable with limited resources like a basic camera, laptop/GPU, and open-source tools.[Github](#)
